

Quality Policy

We are dedicated to meeting our customers' requirements and expectations. To achieve this goal, and to stay ahead of our competition, we must actively listen to and understand our customers' needs, and promptly implement relevant and sustainable improvements in our development and operations.

Icomera AB provides Internet connectivity and application platforms for passenger and freight transport and public safety.

All our products, solutions and services are developed, delivered and maintained with focus on high Quality and safety by:

- Fulfilment of applicable legislation, regulations and standards
- Continuous competence development and assurance
- Relevant and lean processes, including product development
- Always applying a preventive and proactive approach

Objectives needed to ensure that the principles of this policy are met and that continual improvement is maintained, are set, determined and monitored at Management Review.

All Icomera employees have been made aware of this policy and our Quality Objectives. They are expected to take personal responsibility to be customer-focused at all times and to contribute actively to the achievement of these objectives. Our partners and suppliers are encouraged to adopt this policy and abide by our Quality Management System. Together we strengthen our business through innovation and continuous improvement.
